

Ci-T921 Windshield RFID Tag

Ci-T921 is a RFID Windshield Tag for Vehicle management. It usually be attached the car's windshield designed for fast and reliable vehicle identification. It is suitable for a wide selection of automatic vehicle identification applications, such as Intelligent Transportation & Parking Management, Highway Non-Stop ETC, Customs Access control Vehicle Checking.

APPLICATION

- Special Designed for Vehicle Management
- Intelligent Transportation & Parking Management
- Highway Non-Stop ETC
- Customs Access Vehicle Checking

TECHNICAL PARAMETER

| | |
|-------------------------------|---|
| Operating Frequency | 860MHz-960MHz |
| Communication Protocol | ISO 18000-6C/18000-6B |
| Chip Memory | 96 bits EPC memory, 512bit user memory |
| Tid(unique Id) | 64 bits/96bits |
| Access Password | 32 bits |
| Kill Password | 32 bits |
| Operating R/W | For both Reading & Writing |
| Operating Range | 0-10m (the identifying range varies as the reader parameter, equipped antenna parameter and environment differ) |
| Data Retention | 10 years |
| Erase-Write | 100,000 times |
| Encapsulation Material | Paper |
| Mounted | Adhesion |
| Print | Logo/ company information print available |
| Encapsulation Size | 11cm *4.5cm (other size can be customized) |
| Operating Temperature | -20°C~ +85°C |
| Storage Temperature | -40°C~ +85°C |
